PELLON® PRODUCT GUIDE					
SEGMENT	SUB-SEGMENT	STYLE # / PRODUCT NAME	TYPE	WIDTH	DESCRIPTION / PROJECTS
CRAFTS & HOME DÉCOR	TRACING CLOTHS	810 Tru-Grid™	Sew-In	44"	1" printed graph for altering, duplicating or scaling patterns. Stable for ease of drawing.
		830 Easy Pattern®	Sew-In	45"	No-line, no-dots material for altering, duplicating and tracing patterns.
QUILTING	FLEECE	987F Fusible Fleece	Fusible	44"	Adds low-loft body to craft home decor, quilts, handbags & totes.
		988 Fleece	Sew-In	44"	Low-loft polyester fleece. Use where a little padding is needed, when quilting or crafting.
		TP970 Thermolam® Plus Sew-In	Sew-In	45"	Heavily needled polyester fleece. Thicker than 988 Fleece. Gives more loft to project.
		TP971F Fusible Thermolam® Plus	Fusible	44"	A heavier needled-fleece. Adds body, firmness & loft to diaper bags & totes.
	QUILTING AIDS	820 Quilter's Grid™ 1" Grid	Fusible	45"	Lightweight. Simplifies quilt assembly. Place squares, right side up, on top of grid. Iron in place. Sew quilt by the row. For watercolor quilts & fabric-square designs.
		821 Quilter's Grid™ On-Point	Fusible	44"	Same as Quilter's Grid, except printed squares are turned at 45° angle.
FUSIBLE WEBS & ADHESIVES	PAPERBACKED	725 Heavy Duty Wonder-Under®	Fusible	17"	Heavier, with paper backing and double the adhesive of original Wonder-Under®. For appliques & hems in denim, canvas & heavy fabrics. For thick-to-thin combinations. Paper backing eases application.
		800 Clear-Fuse™	Fusible	20"	Easy-to-use clear paper backing with an even firm fusible. Makes cutting patterns easier.
	805 Wonder-Under®	Fusible	17"	Paper backing. Fuse fabric to fabric or a porous surface. Most fabric weights. For heavier fabrics, use 725 Heavy Duty Wonder-Under®. Paper backing eliminates separate transfer sheet; draw on backing with pencil or pen. Fuse hems, facings, appliques & trims.	
NO BACKING	807 Wonder-Web®	Fusible	19"	Unsupported web replaces sewing & gluing. For areas layered between two fabrics, hems & larger areas.	
EMBROIDERY	TEAR-AWAY	360 E-Z Stitch™	Sew-In	20"	Sew-in perforated lightweight stabilizer that tears away. Machine embroidery, appliqué, cut machine work & monogramming.
		806 Stitch-N-Tear®	Sew-In	20"	Tear-away stabilizer for machine stitching, machine embroidery, appliqué, cut work & monogramming.
	CUT-AWAY	380 Soft-N-Stay™	Sew-In	20"	Adds permanent body & support to lightweight knits & woven fabrics. Free-form design, t-shirt knits, dense embroidery designs.
	WASH-AWAY	541 Wash-N-Gone®	Sew-In	20"	All-temperature water-soluble stabilizer. Use for machine embroidery, lighter-weight fabrics or machine lacework. Washes away completely.
		551 So-U-Film™	Sew-In	19.75"	All-temperature water-soluble film stabilizer. Use on top of napped fabrics; use several layers when making machine lace.

## HOW TO SELECT THE RIGHT PELLON® INTERFACING

Interfacing shapes, supports & stabilizes detail areas of a garment, such as collars, facings & waistbands. Choosing the right interfacing is key to a garment's appearance & performance. This guide is designed to help identify the best choices for your project.

Most Pellon® interfacings & craft materials are nonwoven. Nonwovens are made directly from fibers that are bonded together to form a fabric. Nonwovens do not have a grain. They have little or no shrinkage & will not ravel. They can be washed or dry cleaned. Other types of Pellon® interfacings are woven, knitted or weft-inserted.

Interfacing may also be fusible or sew-in. Fusibles have an adhesive on one side which will be activated by your iron. Hand held steamers will not bond interfacing to fabric.

The choice between a fusible & a sew-in interfacing depends on the fabric, the degree of firmness desired & personal preferences. Fusibles are great time savers. They're easy to work with & are compatible with most fabrics. They make a fabric slightly crisper than a sew-in interfacing of comparable weight.

### TIPS & TROUBLESHOOTING:

1. All Pellon® fusibles include complete instructions. Pre-wash the fabric to pre-shrink it & to remove finishes that prevent fusibles from adhering. Check the package instructions. Nonwoven interfacings do not need to be pre-shrunk. Woven & weft-inserted products do.
2. Always test a swatch of fusible interfacing, before using it for a project. Iron temperatures can vary, so a test will help determine the proper setting to use. Use a press cloth.
3. If the fusible test swatch looks wrinkled the fabric may be shrinking. Wash fabric again or use a lower fusing temperature. If the interfacing is too heavy, try a lighter weight or use a sew-in style.
4. Fusibles are meant to be permanent. If you want to remove a fusible interfacing from fabric, & it is not completely fused, reheat the area, pressing lightly. While warm, gently peel up.
5. To remove fusible residue from fabric, iron with a dryer sheet or use a spot remover made for glue & adhesive.
6. Use a hot iron cleaner to remove any fusible residue on the iron. Follow package directions.
7. How to tell which is the fusible side: Most products have a dot adhesive. You can see or feel small dots on the rough side. If the product has a coated adhesive, the fusible side will be shiny.

PELLON® PRODUCT GUIDE					
SEGMENT	SUB-SEGMENT	STYLE # / PRODUCT NAME	TYPE	WIDTH	DESCRIPTION / PROJECTS
APPAREL	BASIC	906F Fusible Sheerweight	Fusible	20"	Sheer to lightweight for stable support in detail areas, without adding weight. Nonwoven.
		910 Sew-In Featherweight	Sew-In	20"	Featherweight to midweight. Add stability to detail areas, button holes, collars, waistbands & facings. Nonwoven.
		911FF Fusible Featherweight	Fusible	20"	Featherweight to midweight. Stabilizes details areas in a wide variety of fabrics. Can use to stabilize T-shirt quilts. Nonwoven.
		911FF Charcoal Fusible Featherweight	Fusible	20"	Featherweight to midweight. Stabilizes details areas in a wide variety of fabrics. Can use to stabilize T-shirt quilts. Nonwoven.
		931TD Fusible Midweight	Fusible	20"	Mid- to heavyweight. Firm support for collars, cuffs, facing & waistbands in active sportswear fabrics, corduroy, chino, poplin & rainwear. Nonwoven.
		P44F JAS Fusible Interfacing	Fusible	20"	Lightweight to midweight. Gentle support for detail areas in blouses, dresses & shirts. Nonwoven.
		P45 JAS Sew-In Interfacing	Sew-In	20"	Lightweight. Adds gentle support to detail areas, like plackets, collars & cuffs. Nonwoven.
	LUXURY FUSIBLES	865F Bi-Stretch Lite™	Fusible	20"	Fine, lightweight. Feels smooth like tricot. Low-melt adhesive. For silk & other fine fabrics. Woven.
		950F Shir-Tailor®	Fusible	20"	For crisp collars & cuffs in all shirting. For firm but not overly stiff waistbands. Nonwoven.
	SPECIALTY	420 Natural Fashion Fuse™	Fusible	18"	Fusible interfacing that adds definition & structure to specialty fabrics. Coats, purses, accessories.
		860F Natural Ultra Weft™	Fusible	20"	Weft insertion interfacing to tailor midweight jackets & coats or fully face jacket fronts. Soft handle.
		EK130 Easy-Knit®	Fusible	20"	Tricot. A leave-in stabilizer for machine embroidery or to underline lightweight or scratchy fabrics. Not for sheer fabrics.
		EK130 Black Easy-Knit®	Fusible	20"	Fusible tricot interfacing and underlining for light to midweight fabrics. Dresses, jackets, pants.
		SF101 Shape-Flex®	Fusible	20"	100% cotton. Light to mediumweight. Designer favorite for small accessories. Woven.
		SF101 Black Shape-Flex®	Fusible	20"	100% cotton. Light to mediumweight. Designer favorite for small accessories. Woven.
		SF785 Woven Sew-In	Sew-In	20"	Woven sew-in interfacing for light to midweight fabrics. Shirts, light jackets, ties or as a stand-alone fabric.
		SK135 Sheer-Knit™	Fusible	20"	Soft sheer fusible tricot for underlining & supple support. Soft blouses & lingerie.
	SK135 Black Sheer-Knit™	Fusible	20"	Soft sheer fusible tricot for underlining & supple support. Soft blouses & lingerie.	
	CRAFTS & HOME DÉCOR	STABILIZERS	40 Midweight Stabilizer	Sew-In	20"
50 Heavyweight Stabilizer			Sew-In	20"	Extra body in craft & home decorating projects.
70 Peltex® Sew-in Ultra-Firm			Sew-In	20"	Multipurpose, ultrafirm. For fabric bowls & boxes. Use in place of cardboard.
71F Peltex® 1-Sided Ultra-Firm Fusible			Fusible	20"	Use for accessories, purse handles & back packs when firm support is needed.
72F Peltex 2-Sided Ultra-Firm Fusible			Fusible	20"	Use in fabric bowls, boxes & fabric postcards in place of cardboard.
808 Craft-Fuse™			Fusible	20"	Crisp iron-on craft backing. Adds body & durability to fabric items, kitchen & personal accessories, wall hangings.
809 Décor-Bond®			Fusible	44"	Firm iron- craft backing. Adds crispness to back of place mats, director chairs, lampshades & drapery headers.
926 Extra-Firm Stabilizer			Sew-In	20"	Firm and stable, yet soft support for crafts & home decor.
