

Fall Paper Flowers for Ceramic Pots

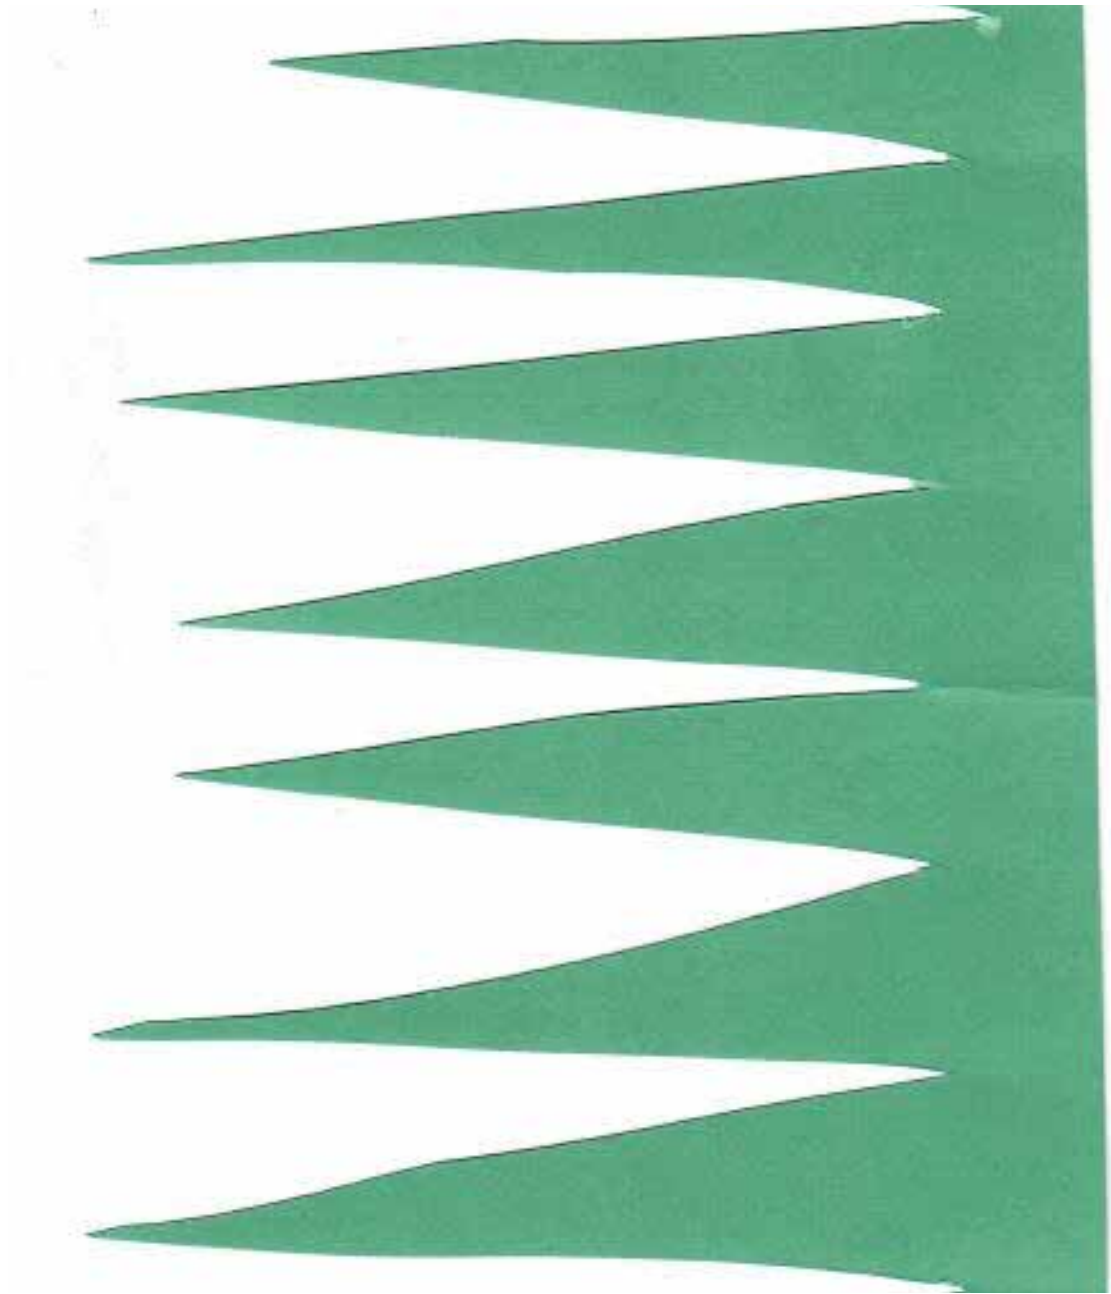

Cut out shapes and score the lines shown.
You will fold each leaf tip to create a more realistic shape.
You can cut as many as you would like to create a larger or smaller plant.

Fall Paper Flowers for Ceramic Pots

Cut out each shape and cut on lines shown.
Do not cut all the way through. You want to
cut just enough to create individual petals.
They will then be curled and shaped for a
more realistic look.
For a fuller flower, cut 2 of each shape.
